THE COMPANY

#01 PERFECTION IN STAINLESS STEEL

MOESCHLE GMBH

With a clear commitment to outstanding professionalism and our capacity for innovation, Moeschle GmbH has become one of the leading suppliers of stainless steel tanks and containers.

"Ongoing product improvement and production optimisation are the keys to Moeschle's success."

When the company was founded in 1970, delivering uncompromising quality and focussing on our core competence were our priorities. Since we manufactured our first containers for a winegrower in Baden, we continued to build on our strengths, allowing Moeschle to quickly develop into a continuously expanding company with real innovative spirit and high-performance production technology.

SINCE 1970

"Since the company was founded, delivering uncompromising quality and focussing on our core competence have been our priorities."

We aim to determine new markets for the future and to consolidate and build on our leading position in container and apparatus construction. We will achieve this through ongoing product development and product optimisation. And behind all of this are our highly-qualified employees, who have extensive product know-how.

"Our employees are individuals with expert knowledge of their field."

Customers expect continual improvement in quality, efficiency and affordability; indeed, the markets impatiently expect manufacturers to develop and enhance their products on an ongoing basis. This leads to more intense competition and has caused us to streamline our management processes, strengthen our sales division and work more closely with customers.

In doing this, we have to satisfy the needs of the market by further developing our products on an ongoing basis. We continually want to set the bar that little bit higher for the industry as a whole and thereby secure the **"Moeschle Group's"** position as the technological leader in the future.

THE MOESCHLE GROUP

#02 CLOSE TO OUR CUSTOMERS THROUGHOUT EUROPE

QUALITY FROM GERMANY

Today, the name Moeschle is known virtually all over the world. Whether it's for local winegrowers, international fruit juice manufacturers or large industrial companies, Moeschle products are synonymous with state-of-the-art technology of the best quality.

The Moeschle Group's exports in its main sales areas in Western and Eastern Europe are more than 60%.

CLOSE TO OUR CUSTOMERS

In order to optimally serve the key markets of the future in Eastern Europe and the UK, the subsidiaries Moeschle Polska Sp. z o.o., located near Poland's border with Ukraine, and Moeschle (UK) Limited in Sheffield were founded in 2002.

"Moeschle has expanded as a result of its innovative force, high-performance technology, qualified employees and proximity to its customers."

SHEFFIELD (UK)

England's steel capital has been home to the company's sales office for the UK and Ireland since 2002.

ORTENBERG (D)

The wine- and fruit-growing area of Ortenau in Baden has served as the company's headquarters and production site since its foundation in 1970.

DYNÓW (PL)

The Polish town situated near the Carpathian Mountains has been home to the company's production site and sales office for Eastern Europe since 2002.

#03 PROVIDING COMPREHENSIVE SUPPORT

DESIGN

Every tank has to satisfy stringent safety and customer requirements. Ultra-modern CAD software is used to ensure this.

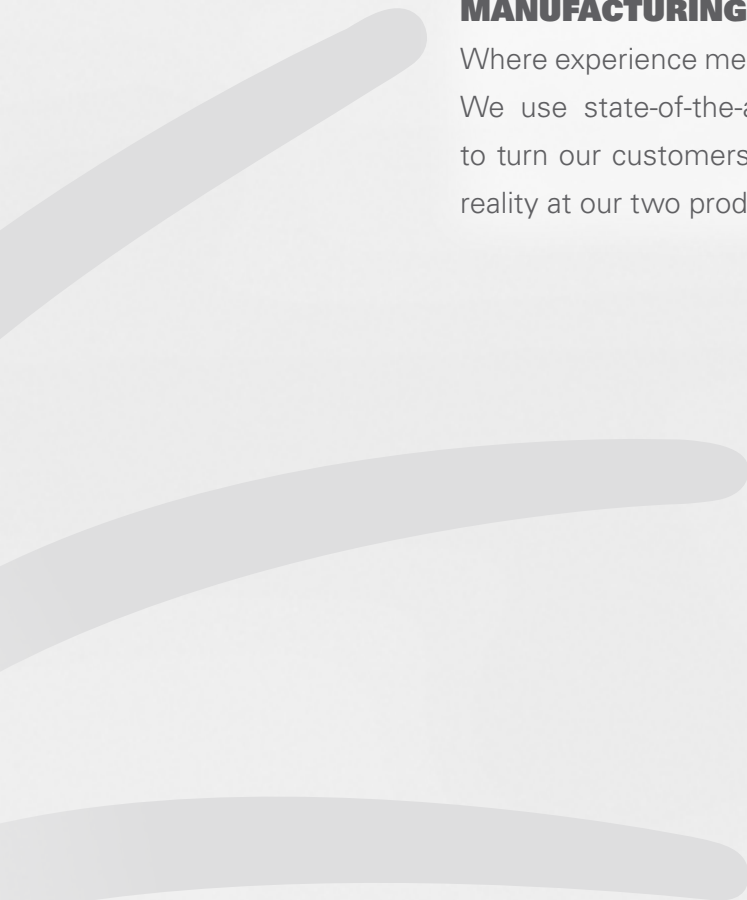

DEVELOPMENT

We undertake systematic and continuous research to improve our products.

PLANNING & ADVICE

Here, we focus on face-to-face discussion with our customer.

MANUFACTURING

Where experience meets know-how.
We use state-of-the-art technology
to turn our customers requests into
reality at our two production sites.

INSTALLATION

Because our containers can hold up
to 1 million litres, it is more practical
to install containers above a certain
size on-site.

AFTER-SALES SERVICE

Our high quality standard requi-
res us to be there for our custo-
mers at all times, even after they
have made their purchase.

YOU ARE OUR PRIORITY.

We consider our customers to be partners whom
we accompany individually through the entire
production process, including production prepa-
ration, the production process itself and our after-
sales service. Only when all the components of a
solution installed by us are seamlessly integrated
in your overall operational processes do we con-
sider a job to be successfully completed.

Your individual requirements are the focus of
what we do from the very beginning. For this rea-
son, we conduct intensive planning and consul-
tancy talks prior to each project. The combination
of our engineers extensive experience and the
latest CAD software guarantees effective results.
Only in this way can a perfect stainless steel solu-
tion be created from an abstract planning model.

TECHNOLOGY

#04 FINEST TECHNOLOGY

#01 Automatic welding

Our quality standard is basically supported by three factors: the quality of the material, the production process, which we accompany every step of the way in a specialist capacity, and technical know-how. There is a good reason why we are investing in increasingly powerful production systems. As an ISO-certified company, we regularly perform audits and undertake further training too.

WE PERFORM

- ✓ X-ray tests in line with DIN EN 1435
- ✓ ultrasound tests in line with DIN EN 54125
- ✓ sheet thickness measurements
- ✓ roughness measurements
- ✓ VT tests (video probes)
- ✓ PT tests in line with DIN EN 571-1 (surface crack tests)

#02 Manufacturing bumped boiler ends

WE ARE CERTIFIED

- ✓ DIN ISO 9001:2008
- ✓ Directive for Pressure Equipment certificate (AD2000)
- ✓ Directive for Pressure Equipment certificate (module H)
- ✓ specialist operation according to §19 of Germany's Water Management Act (WHG)

ONE MATERIAL, A MULTITUDE OF BENEFITS

Numerous construction possibilities provide the best conditions for optimum use of space. Whether it has integrated cooling options, heating options or agitators, whether it comes in special shapes or sizes, a Moeschle tank will safely store

more than just wine and beer. We can suggest an innovative, forward-looking response for special solutions for which you have specific storage requirements.

"NOTHING IS IMPOSSIBLE!"
